# EASYCHECK

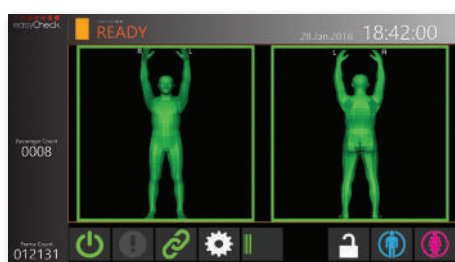

EasyCheck™, a **Walk-Through People Screening system**, provides a real-time security solution that automatically detects prohibited items that may be concealed underneath clothing.

EasyCheck™ provides the ultimate balance between security demands, checkpoint traffic growth, operation considerations and screening process convenience. Throughput makes EasyCheck™ suitable for airport checkpoints as well as entry points, mass transit, large venues and critical infrastructure.

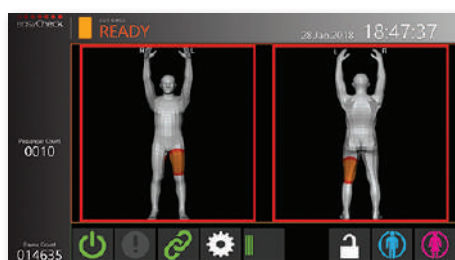

## FEATURES

- Detection of rigid, fluid and flexible metallic and non-metallic materials such as bulk and sheet explosives, weapons, knives, drugs, liquids, powders, gels, and other unauthorized items.
- Very high throughput.
- Superior penetration through clothing, allowing people to keep their outer garments on during screening, including coats, jackets, leather clothing, etc.
- Unique design providing full body coverage from all directions (front, back and sides).
- Real-time detection results.
- Wheelchair accessibility.
- No moving parts.

## USER INTERFACE

### CLEAR PERSON

### SUSPECT PERSON

## TECHNICAL SPECIFICATION

<b>Detection materials</b>	metallic, non-metallic, gels, liquids, ceramics, plastics, powders and many more.
<b>Throughput</b>	up to 1000 people per hour.
<b>Dimensions</b>	H: 2490 mm W: 1833 mm L: 2450 mm Entrance width: 816 mm
<b>Power supply</b>	110-240 V
<b>Weight</b>	323 Kg
<b>Gate power consumption</b>	less than 1000 Watt
<b>Environment</b>	Gate: 0-40° C (Server 0-35° C)
<b>Compliance with standards</b>	for radiation, health, electrical, electromagnetic and hazardous substances.

## TECHNOLOGY

EasyCheck™ uses a novel approach, based on a multiple array of micro power Ultra-Wideband (UWB) radio sensors to provide non-ionizing, high resolution, three dimensional real-time body representation.

Relatively low frequencies enable excellent penetration through multi-layer clothing items, making the screening process more efficient.

Unique design provides enhanced full body coverage.
